SKILLS

Data Analytics & Visualization : Power BI, Advanced Excel, Tableau, Data Storytelling, ETL Processes, Data Pipeline Development

Languages : Python (Pandas, NumPy, Matplotlib, Scikit-learn), JavaScript (React.js), HTML/CSS, SQL, Java

Tools : Microsoft Office Suite, Github, Git, AWS

PROJECTS

Business Intelligence Dashboard - Multi-Source Data Analytics – [PowerBI | DAX | Data Modelling | Excel]

- Developed a Power BI dashboard integrating multi-source data to deliver real-time insights for business decision-making
- Created interactive visualizations (KPIs, trends, heatmaps) for intuitive data analysis and reporting
- Applied data modeling and DAX to build calculated metrics and optimize performance tracking

Scrapeazon - E-commerce Data Extraction Platform – [Flask | Python | BeautifulSoup | REST API | Git]

- Engineered a Flask-based REST API to automate Amazon product data extraction, enabling real-time market research, competitor price monitoring, and inventory analysis without manual intervention
- Achieved **>95% data accuracy** by implementing sophisticated parsing logic to extract 7+ key attributes per product: name, price, rating, review count, availability, discount percentage, and Prime eligibility status
- Built scalable scraping architecture capable of **navigating 20+ pages and retrieving 100+ unique listings** per query with duplicate elimination, suitable for both small-scale queries and large-scale data collection tasks

Car Finder - Multi-Source Vehicle Data Aggregator – [Flask | Python | BeautifulSoup | REST API | JSON]

- Developed a unified data aggregator integrating data from 2 New Zealand car dealership websites (**Andrew Simms, NZ Cheap Cars**), consolidating up to **100 vehicles** per search query with standardized attributes
- Implemented intelligent parsing logic to extract **8 critical vehicle attributes** including price, odometer reading, mileage, transmission type, fuel type, and vehicle condition across 6+ pages of search results

EXPERIENCE

Quant AI Limited

May 2025 – Aug. 2025

Data Scientist Intern (Remote)

Auckland, NZ

- Designed and developed backend services and automated data pipelines using Python and Flask, handling large-scale structured and unstructured datasets.
- Built and deployed web scraping solutions to collect and preprocess data from multiple sources, improving data availability for analytics
- Engineered automated ETL pipelines for real-time data collection and preprocessing, improving data availability for analytics use cases
- Collaborated with team using Git for version control and Agile sprints to deliver production-ready code
- Enabled data-driven decision making by preparing datasets suitable for visualization tools like Power BI/Tableau

EDUCATION

Vellore Institute of Technology, Bhopal

Aug. 2022 – June 2026

B Tech in Computer Science and Engineering (Cyber Security and Digital Forensics)

Bhopal, MP

- **Coursework**: Data Analytics, Database Management Systems (SQL), Business Intelligence & Data Visualization, Data Mining, Data Structures and Algorithms
