

# AVIRAL YADAV

Noida, Uttar Pradesh

+91-7007934595   aviy2402@gmail.com   LinkedIn   Github   Portfolio

## EDUCATION

**Vellore Institute of Technology**

*B.Tech - Computer Science and Engineering (Cyber Security and Digital Forensics) | CGPA - 8.01*

Bhopal, Madhya Pradesh

2022 - 2026

## TECHNICAL SKILLS

**Data Analytics & BI:** Power BI (Dashboards, DAX, KPI cards), Tableau, Microsoft Excel (Pivot Tables, Formulas), Exploratory Data Analysis (EDA), Data Cleaning & Validation, Data Visualization

**SQL & Databases:** PostgreSQL, MySQL, SQL

**Programming & Development:** Python (Pandas, NumPy, Scikit-learn), Java, JavaScript, HTML/CSS, React.js, Node.js, Express.js, Flask, REST APIs

**Tools & Version Control:** Git, GitHub, BeautifulSoup, Visual Studio Code

**Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, Statistics, Problem Solving

## EXPERIENCE

**QuantAI** [\[link\]](#)

*Data Scientist Intern*

May 2025 – August 2025

*Auckland, New Zealand*

- Analyzed 3,900+ customer records across 18 attributes using PostgreSQL to uncover revenue trends, customer behavior, purchasing patterns, and discount-period performance.
- Applied CTEs, joins, aggregations, and window functions across 10 optimized SQL queries to investigate transaction trends, discount impact, customer segmentation, and repeat-purchase behavior.
- Developed an interactive Power BI dashboard incorporating KPI cards, revenue visualizations, demographic filters, and performance metrics to support exploratory and self-service data analysis.
- Translated analytical findings into actionable business insights through dashboards and visual reports, supporting data-driven decision-making and identification of customer and revenue trends.

## PROJECTS

**AI Expense Tracker** [\[link\]](#)

- Created a full-stack personal finance management application with JWT authentication, enabling users to manage income, expenses, categories, transactions, and monthly budgets.
- Engineered RESTful APIs using Node.js and Express.js with PostgreSQL for secure user-specific data management, dashboard analytics, budget tracking, and spending analysis.
- Integrated Google Gemini AI to analyze transaction data and generate personalized spending insights and financial recommendations; deployed the application using Vercel and Render.

**Music Recommender System — Data Pipeline** [\[link\]](#)

- Engineered a content-based music recommendation system using Python, Scikit-learn, and Pandas on a dataset of 4,800 songs from 605 artists, generating the top 5 recommendations for each query.
- Applied TF-IDF vectorization and cosine similarity to analyze song metadata and perform similarity-based recommendation and retrieval.
- Connected the Spotify API with an interactive Streamlit application to retrieve real-time album artwork and deliver an end-to-end music search and recommendation experience.

**Scrapeazon — Amazon Product Scraping Platform** [\[link\]](#)

- Architected a full-stack web scraping platform using Python, Flask, BeautifulSoup, and React to extract structured product data from paginated Amazon search results, capturing 9 attributes per listing.
- Strengthened scraping reliability through user-agent rotation, retry logic, and exponential backoff for resilient data collection.
- Optimized the application to deliver search results in under 10 seconds and deployed the platform using Render and Vercel.

## CERTIFICATIONS

- The Bits and Bytes of Computer Networking - Google
- Introduction to Data Science - Infosys Springboard
- Introduction to Modern AI - Cisco Networking Academy
